STRONG METAL MECHANISM

Control System

With its stylish design, intuitive visualization of purpose and LED lighting, user comfort is at the forefront. The dual motor, which provides back and seat movements, can be controlled independently by four buttons.

Automatic Return Pad

Auto return is designed for both safety emergencies and operator convenience.

Within an emergency it is ideal that all seats return to upright position to allow for patrons to evacuate safely.

The auto return also allows for operators to save time returning recliners to upright position after a film session.

Easy Assembly and Revision

All electronic system components are designed to be easily detachable. Motors, connecting cables, control buttons and materials that may need revision or replacement in case of prolonged use can be intervened on site.

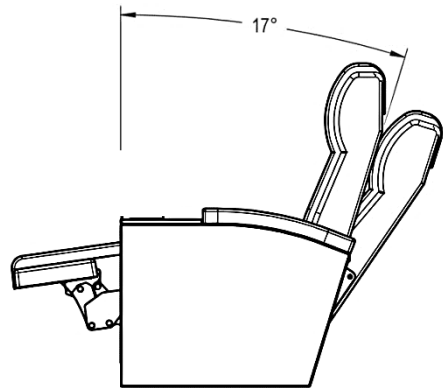

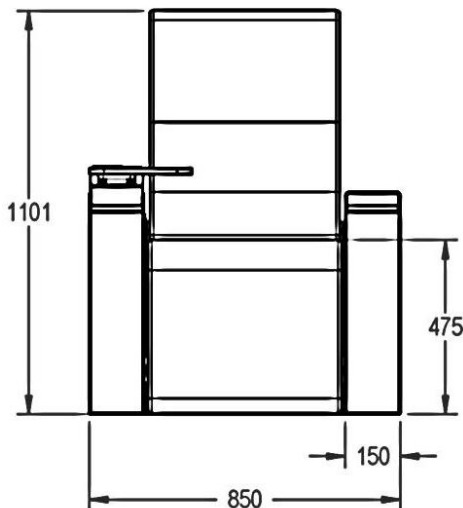

Motors

Good quality and long lasting motion motors.
Industrial grade recliner mechanism ensures a
working upwards and downwards motion every
time without fail.

Technical Dimensions

- **Axle Seat** : 74 cm (Optional)
- **Seating Width** : 60 cm (Excluding Arms)
- **Overall Width** : 88 cm (Including Arms)
- **Overall Height** : 110 (±1 cm)
- **Seating Height** : 48 (±1 cm)

- Extremely comfortable, generously proportioned individual seat for use in VIP cinemas or Home Cinema.
- Elegant, contemporary design
- Automatic mechanism which allows the back and footrest to be adjusted by the user. Both movements are controlled by a touch screen situated on the side of the chair with extremely simple, easily accessible user instructions
- Automatic return system for a tidy room when not in use
- Various accessories can be included to meet the requirements of each cinema: generously proportioned lecterns integrated into the seat's armrest, cupholder, tray, individual rotary table and side table between two seats
- Finish in leather with microperforated areas to improve transpiration. Upholstery is performed by craftsmen.
- Lowline seat height has been designed to give the ultimate comfort. The seat height is specially designed to give users the ideal foot extension and perfect ergonomic support
- Industrial grade recliner mechanism ensures a working upwards and downwards motion every time without fail.
- A specially designed foot extension that can amazingly allow for 150 kilograms to be situated comfortably at its tip during full extension. It is this superior quality that sets SeatUp Turkey® recliners apart from the competition. The installation of a safety footrest mechanism also allows for the safe operation of the return, resulting in no injury from the collapsing motor.
- Stylish design with easy-to-clean and easy-to-replace parts.
